## ABSTRACT

This packet of reading problem exercises is designed to be used by either the tutor or the classroom teacher for the purpose of informally assessing reading proficiency in children. There are two sets of cards in this packet. Each reading skill identified has two items--one appearing in each set of cards. The reading problem-solving exercises have been designed so that one from either set of cards is to be given to the child before instruction; the other item is to be given to the child when either the teacher or the tutor decides the child can perform the task efficiently. The exercises contained in this packet are not intended to be comprehensive in nature. They simply isolate specific reading skills and are to be used for the purpose of informally examining reading proficiency in children. (See CS 000 458 for related document.)

The reading problem exercises contained in this packet are designed to be used by either the tutor or the classroom teacher for the purpose of informally assessing reading proficiency in children. There are two sets of cards in this packet. Each reading skill identified has two items: one appearing in each set of cards. The reading problem solving exercises have been designed so that one from either set of cards is to be given to the child before instruction; the other item (from the other set of cards) is to be given to the child when either the teacher or the tutor decides the child can perform the task efficiently. By keeping a record of the amount of time required to master the given skill, the teacher or tutor can maintain a record of skill development in each child.

The items in this packet correspond to the sample lessons which are found in the Tutor Handbook. We have included problem solving exercises for all reading skills that can be properly assessed in this manner. You will note, as an example, that we do not have a problem solving exercise for Sample Lesson Two in the tutor handbook. Each exercise is numbered to correspond with the lesson in the handbook; therefore there will be some missing numbers.

The exercises contained in this packet are not intended to be comprehensive in nature. They simply isolate specific reading skills and are to be used for the purpose of informally examining reading proficiency in children.

The tutor training materials were designed by Dr. William Furlong of the National Reading Center. These materials were prepared for the Center through a contract with Dr. Leo C. Fay, Dr. J. Laffey and Dr. Carl Smith of the Indiana University Reading Program. Various individuals contributed to sections of the materials and they are credited according to the contractors' directions. Final preparation of the materials was supervised by Dr. Furlong.

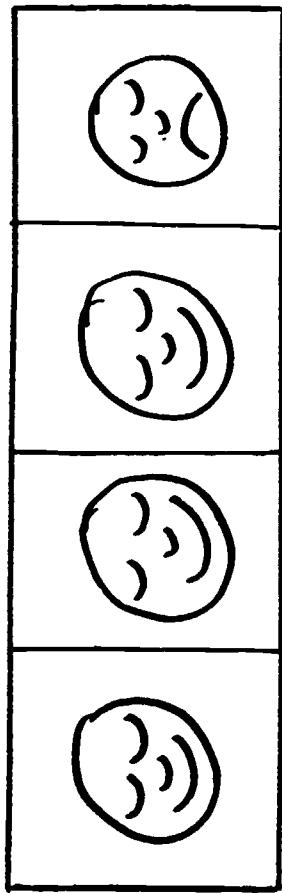

The project presented or reported herein was performed pursuant to a Grant from the U.S. Office of Education, Department of Health, Education, and Welfare. However, the opinions expressed herein do not necessarily reflect the position or policy of the U.S. Office of Education, and no official endorsement by the U.S. Office of Education should be inferred.

Some plants are worn rather than eaten. Did you know the cotton in your clothes once grew on a plant? Your mother's linen tablecloth was once part of a flax plant. We don't wear or eat trees and grass, but they do make life more pleasant. Trees give us shade; and grass, beauty. Some plants, however, are problems to man. Have you ever had poison ivy? A bad case can be painful and dangerous. If you live in the West, look out for poison oak! We all know weeds can cause trouble. Johnson Grass chokes out useful plants. Many people have hay fever from ragweed.
